Professional Summary

Senior Offline Robot Programmer with 9+ years of experience in paint robot programming and industrial robot programming, including offline programming, robotic paint application systems, site commissioning, application prove-out, customer technical support, and process optimization within automotive manufacturing environments. Experienced in ABB, Yaskawa, and Dürr robotic systems with hands-on expertise in commissioning, troubleshooting, robot path optimization, defect elimination, and global technical support. Successfully completed advanced Germany training for Dürr robot systems.

Key Skills & Expertise

- **Programming & Commissioning** – Painting, Industrial robots & application systems
 - **Process Optimization** – Improving paint application quality & efficiency
 - **Error Analysis & Troubleshooting** – Identifying and eliminating defects
 - **Start-Up Support** – Assisting in system deployment after commissioning
 - **Training & Support** – Conducting training & technical instructions
 - **Service Operations** – Maintenance & troubleshooting of painting systems
 - **Technical Proficiency** – Experience with robot programming & paint application
 - **Communication & Teamwork** – Strong interpersonal & problem-solving skills
 - **Global Travel** – Willingness to travel worldwide for assignments
-

Professional Experience

Senior offline Robot Programmer / Senior Engineer

Durr India Pvt Ltd, – Chennai. | Present

- Experienced in industrial robot programming, troubleshooting, and optimization for automated paint shop applications using robotic systems and offline programming tools.
- Expertise in paint process optimization including sealer, primer, base coat, clear coat, dual-tone application, and process parameter validation for high-quality surface finish.
- Hands-on experience in robot path teaching, program modification, cycle time improvement, collision avoidance, and production line efficiency enhancement.
- Proficient in paint application equipment handling including atomizers, bell applicators, dosing systems, colour change systems, and conveyor synchronization.
- Strong knowledge of process validation activities such as pattern testing, paint transfer efficiency analysis, defect reduction, and root cause analysis for paint quality issues.
- Experience in PLC signal interfacing, RFID integration, sensor monitoring, fault diagnosis, and coordination with automation systems for smooth line operation.
- Managed robot commissioning, process trials, debugging, and production support during new model launches and line modifications.

- Coordinated cross-functional teams including production, maintenance, quality, process engineering, and vendors for project execution and issue resolution.
- Planned and monitored project activities including installation scheduling, testing milestones, risk assessment, and on-time implementation.
- Prepared technical documentation such as SOPs, process sheets, parameter sheets, troubleshooting guides, and project status reports.
- Led continuous improvement initiatives focused on cycle time reduction.

Vehicle production engineering / Engineer

Renault Nissan automotive India Pvt Ltd, – Chennai. | 08/01/2024 to 19/09/2025

- Facility improvement for new projects and serial life model.
- Ensures **robot paint application (Metal & plastic part)** and Yaskawa NX-100 & Durr EcoRP E/L033i robot programming to reach expected quality and performance levels.
- Sealer **robot application** and ABB IR4600 robot programming to reach expected quality and performance levels.
- Assessed impact of modification requests for ongoing projects.
- Provided technical direction of system development methodologies to improve technical performance.
- Designed and optimized manufacturing processes, reducing **robot application** cycle time.
- Developed and validated standard operating procedures (SOPs) for vehicle assembly and **quality control**.
- Collaborated with **paint suppliers** to improve material quality, reducing defect rates.
- Developed and implemented **paint colour matching** techniques to ensure high-quality finishes.

Painting Robot Programmer / Junior Engineer

Seoyon E-HWA automotive India Pvt Ltd, – Chennai. | 03/2021 to 01/2024

- Yaskawa NX-100 **Robot programming and application systems** for plastic part (Bumper painting).
- Optimize **painting processes** to improve efficiency, reduce waste, and enhance finish quality.
- Diagnose and eliminate **errors and defects** in robotic painting applications.
- Provide **on-site training** on robot operation, maintenance, and troubleshooting.
- Support **system start-up** after weekend and conduct service operations.
- Conduct **field service operations** and respond to customer issues in a timely manner.

Painting Robot Programmer / Assistant Engineer

Motherson automotive technologies and engineering, – Pune. | 06/2019 to 03/2021

- Assisted in **robot programming** and **painting system optimization**.
- Conducted **technical support and maintenance** of painting application systems.
- Worked closely with **cross-functional teams** to improve system performance and customer satisfaction.
- Streamlined ABB IRB 5500 robot programming into **projects to shorten developments**.
- Debugged problems caused by **ABB IRB 4600 & 5500 robot program**, operating systems.

Painting Robot Operator / Trainee

Royal Enfield – Chennai | 05/2017 – 11/2018

- Monitor **RB1000 atomizer & RB926 atomizer paint** parameters and ensure quality.
 - Inspected finished products for **quality and adherence** to customer specifications.
 - Collaborated with other departments to optimize production workflows.
 - Performed break down maintenance and repair to minimize downtime.
 - Trained new production trainee members on safe and efficient production procedures and **proper robot operations**.
 - Investigated processing errors and malfunctions, resolving issues with minor **robot programming modification**.
-

Education & Certifications

- **Diploma** – Lakshmi ammal polytechnic college, 2017
 - **Bachelor of Technology** – Kalinga university, 2020
 - **Masters of business administration** – Loyola college, 2025
-

Languages

- **English** – Proficient
 - **Tamil** – Proficient
-

Certification:

- ABB Robot training at Bangalore.
- Yaskawa Robot training at Chennai.
- Dürr robot systems training at Germany

Personal information:

- Age : 27
- Nationality : Indian
- Marital status : Unmarried

Additional Information

- **Willing to travel worldwide** for assignments
- **Field service experience**
- **Proficiency in [DXQ 3D onsite, Robot studio, Robview, FFFTP, Motosim]**
